

## FlashAir™ Installation Procedure for Mac

### [Download FlashAir Configuration Software for Mac OS](#)

Double-click the downloaded "FlashAir\_tool\_v400\_b.dmg". A new Finder window containing the "FlashAirTool.app" is automatically displayed.

Drag and drop the displayed "FlashAirTool.app" onto the required installation folder (for example, the "Applications" folder).

"FlashAirDrive.app" is the application to use FlashAir drive. If you want to use FlashAir drive, please install it as well.
