 - * download and activation key may be required

Scan Photos in Place. Anywhere... Anytime

StoryScans™ Images Talk, and Yours Can Too!

StoryScans software enables you to easily transform images scanned by the Flip-Pal mobile scanner into endearing stories. It combines the recorded voice of the storyteller with the scan file into a single multimedia file that is both small and High Definition. All the nuances from an in-person conversation are important to really know the true meaning of stories, and the emotional feeling is sometimes lost in written format. With StoryScans talking images, the original story in the voice of the storyteller is recorded and forever kept with the image.

"It's easy to make. Add more sugar for sweet pies, add sage for pot pies - I forgot that"...

"Me and Dan!! He lives next door! I made this"

Easy to Create

- ❑ select the scan
- ❑ record the voice
- ❑ save the file

Easy to Share

- ❑ voice and image never get separated
- ❑ no additional player required
- ❑ compatible with email, social media, and cloud services

"This is your Uncle Harry ... (sigh) I miss him every day"

For Windows or OS-X computers, use the Flip-Pal Toolbox 4 software. Download and activation key may be required.

For mobile devices, use the ScanTools app from iTunes or Google Play.

Compatible with all Flip-Pal scanners.

StoryScans talking images are even easier to create with the Flip-Pal Wireless Upgrade.

FlipPal®

mobile scanner

The Flip-Pal mobile scanner enables you to effortlessly scan precious photos, important documents, large and fragile records of personal and family history, detailed coins, jewelry, medals, hand-drawn art, fabrics, and other keepsakes. Now they can be safely kept in digital form rather than scattered, lost or unable to be found. Then share with family and friends. Take advantage of the patented flip-and-scan technology to scan photos while still in the album or frame, treating fragile personal records gently. The EasyStitch software quickly and automatically reassembles multiple scans into their larger original. Create photos that talk using the StoryScans™ software, transforming your images into endearing stories.

Unlike alternative solutions that don't have the combination of mobility, simplicity, accuracy, versatility, and keeping the original safe, the Flip-Pal mobile scanner is compact, simple to operate, has high resolution, quick scan time, battery power, SD memory, and a computer is not required to scan.

Mobile - Scan Images Anytime, Anywhere

- ✔ Compact, lightweight, and durable
- ✔ Cordless. No cables to connect
- ✔ Powered by four AA batteries
- ✔ Stores scans on a SD memory card (like the one in your digital camera)

Accurate - High Quality Digital Image

- ✔ High resolution retains the detail
- ✔ Color and dimensions true to the original
- ✔ 600 and 300dpi resolution settings

Versatile - Scan Small to Large Originals

- ✔ EasyStitch software reassembles multiple scans of a large original
- ✔ Photos, art, fabric, keepsakes, newspapers, bound books
- ✔ Fragile letters, historical, military and family history documents
- ✔ Small objects like coins, medals, and jewelry

Keeps Your Originals Safe

- ✔ Photos or documents stay safely in place
- ✔ Patented flip-and-scan technology. Remove the lid, flip the scanner over and place it on the original
- ✔ Safeguard important documents and images by converting to digital and storing in a safe location

Simple and Quick

- ✔ Push one button to scan in seconds
- ✔ A computer is not required to scan
- ✔ Display for viewing and confirmation
- ✔ See-through window for framing the original
